Backend:

Database Schemas (Folder -> models)

User Schema:

```
const userSchema = new mongoose.Schema({
    username: {
        type: String,
        required: true,
        unique: true,
    },
    password: {
        type: String,
        required: true,
    },
    email: {
        type: String,
        required: true,
        type: String,
        required: true,
        tonique: true,
    }
    role: {
        type: String,
        required: true,
        unique: true,
    }
    role: {
        type: String,
        required: true,
        unique: true,
    }
    role: {
        type: String,
        reduired: "user",
    }
    createdAt: {
        type: Date,
        default: Date.now,
    },
    }
}
```

OrderSchema:

```
• • •
   const orderSchema = new mongoose.Schema({
     school_id: {
       type: String,
       required: true,
     trustee_id: {
       type: String,
       required: true,
    student_info: {
      name: { type: String, required: true },
       id: { type: String, required: true },
      email: { type: String, required: true },
     gateway_name: {
       type: String,
       required: true,
     amount: {
       type: Number,
       required: true,
     edviron_collect_id: {
       type: String,
       required: true,
    custom_order_id: {
     type: String,
       required: true,
     createdAt: {
     type: Date,
       default: Date.now,
38 // Add indexes for frequently queried fields
39 orderSchema.index({ school_id: 1 })
41 module.ex
```

Order Status Schema:

```
const orderStatusSchema = new mongoose.Schema({
    order_id: {
        type: mongoose.Schema.Types.ObjectId,
        ref: "Order",
        required: true,
    },
    order_amount: {
        type: Number,
        required: true,
    },
    transaction_amount: {
        type: Number,
        required: true,
    },
    gateway:{
        type: String,
    },
    bank_reference: {
        type: String,
    },
    status: {
        type: String,
    },
    payment_mode: {
        type: String,
    },
    payment_mode: {
        type: String,
    },
    payment_message: {
        type: String,
    },
    payment_time: {
        type: Date,
        default: Date.now,
    },
    edviron_collect_id: {
        type: String,
    },
    required: true,
    },
    required: true,
    },
    // Add indexes for frequently queried fields
    orderStatusSchema.index({ order_id: 1 })
    orderStatusSchema.index({ order_id: 1 })
    orderStatusSchema.index({ order_id: 1 })
    orderStatusSchema.index({ order_id: 1 })
```

Webhooks Log Schema:

```
const mongoose = require("mongoose")

const webhookLogSchema = new mongoose.Schema({
    collect_request_id: {
        type: String,
            required: true,
    },
    status: {
        type: String,
        enum: ["PENDING", "SUCCESS", "FAILED"],
        default: "PENDING",
    },
    order_id: {
        type: mongoose.Schema.Types.ObjectId,
        ref: "Order",
        required: true,
    }
}

module.exports = mongoose.model("WebhookLog", webhookLogSchema)
```

1. Authentication

Register user

```
Request body -> username, email,password, confirm password.
    Local host Url
    http://localhost:3000/api/auth/register

Deployed Url
    https://edviron-full-stack-developer-assessment.onrender.co
m/api/auth/register
```

```
Login User
Request body -> username , password
     Localhost Url
     http://localhost:3000/api/auth/login
     Deployed Url
     https://edviron-full-stack-developer-assessment.onrender.co
m/api/auth/login
Get Current user data
Protected route -> Before going to this route login first.
     Local host Url
     http://localhost:3000/api/auth/me
     Deployed Url
     https://edviron-full-stack-developer-assessment.onrender.co
m/api/auth/me
Payment Routes:
Request body -> { "school_id": "65b0e6293e9f76a9694d84b4", "amount": 100 }
Create Payments
http://localhost:3000/api/payments/create-payment
```

https://edviron-full-stack-developer-assessment.onrender.com/api

/payments/create-payment

Webhook endpoint

http://localhost:3000/api/payments/webhook

https://edviron-full-stack-developer-assessment.onrender.com/api
/payments/webhook

Check Payment Status

http://localhost:3000/api/payments/check-status

https://edviron-full-stack-developer-assessment.onrender.com/api/payments/check-status

Transactions endpoints :

Get All Transactions:

http://localhost:3000/api/transactions/

https://edviron-full-stack-developer-assessment.onrender.com/api
/transactions/

Get transaction by school id:

http://localhost:3000/api/transactions/school/:schoolId

https://edviron-full-stack-developer-assessment.onrender.com/api
/transactions/school/:schoolId

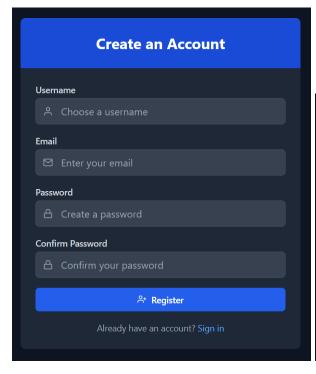

Check status of a transaction by customOrderId :

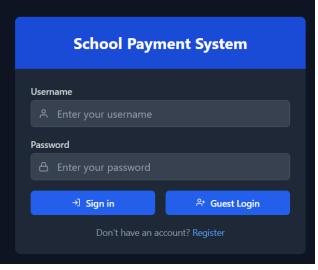

http://localhost:3000/api/transactions/status/:customOrderId

https://edviron-full-stack-developer-assessment.onrender.com/api
/transactions/status/:customOrderId
